

535 Insights

Connecticut 2nd District

Our mission is to bridge the gap between policymakers and investors to create economic security for workers and families.

We equip policymakers with data-driven insights to mobilize **private capital** to generate prosperity across the country. Our **535 Insights** series provides analytics specific to the constituencies of all 535 Members of Congress.

of businesses are at risk of succession⁴

RANK 24 OUT OF 435

The opportunity to build wealth and economic security is the foundation of the American Dream. This is how **the Connecticut 2nd District** is performing (ranked by desirability).

To revive the American Dream, the **2nd District** needs a strategy to promote economic opportunity.

HERE'S WHERE WE'RE STARTING:

Affordable Housing

By making it easier to finance **affordable housing** and the expansion of **home ownership** we can help build strong communities where families will thrive.

Employee Ownership

By expanding **employee ownership** through **Employee Stock Ownership Plans (ESOPs)**, we can create generational wealth for American workers while enhancing U.S. competitiveness.

Turn the page to see how **the 2nd District** is doing on affordable housing and employee ownership.

Affordable Housing & Homeownership

The Connecticut 2nd District is facing housing supply and affordability challenges. This is contributing to unsustainable financial burdens for families and creates barriers to economic opportunity.

38x

is what a typical family owning a home has in net worth compared to a family renting⁵

NATIONWIDE

48%

of renters are burdened by housing costs⁶

31%

of state residents are facing eviction or foreclosure⁷

RANK 31 OUT OF 50

11%

of residents live in high poverty areas⁸

RANK 145 OUT OF 435

The United States is 4 million homes short of meeting national demand, a shortfall that has almost doubled over the past decade.¹⁰ **Connecticut** has a shortfall of 43,817 units.¹¹ This undersupply contributes to rising housing costs which force working-class families to spend an unsustainable portion of their income on rent and pushes many households into neighborhoods with high poverty rates.¹² Research demonstrates that living in areas of concentrated poverty makes it harder for kids to rise up the income ladder.¹³ Housing cost-burdens are also rising for middle- and higher-income families, while rising housing costs have led to the American Dream of homeownership becoming increasingly unattainable—narrowing pathways for families to build wealth.¹⁴

Of the over \$200 billion that has been invested annually in housing in recent years, only a fraction supports projects affordable for working-class families.¹⁵ Innovative models capable of significantly boosting the supply of affordable housing exist but struggle to attract capital to scale. New policies, programs and financing tools are needed that redirect private capital into projects that promote financial stability and homeownership, and help build strong, resilient communities.

Employee Ownership

The United States is confronting a “silver tsunami” of retiring business owners that are likely to sell their businesses over the next decade. Meanwhile, too many American workers and families are financially unprepared for retirement.

52%

of businesses have an owner aged 55 or older¹⁹

RANK 24 OUT OF 435

12%

of businesses operate in critical industries and have an owner aged 55 or older²⁰

54%

of all Americans aged 15 to 64 have no retirement account²¹

NATIONWIDE

-17%

reduction of retirement savings of working-class Americans 2022 vs. 2016²²

NATIONWIDE

Without a policy strategy to address business succession, we risk the loss of American businesses and their local jobs. Too often, the sale of a business to an out-of-state or foreign buyer results in the loss of local jobs and investment. With many businesses in critical industries—e.g., those with implications for national and economic security—facing the challenges of business succession, promoting employee ownership can be part of a broader competition framework to maintain our leadership in strategic sectors while investing in American workers.

What is an ESOP? The Employee Stock Ownership Plan (ESOP) is both a retirement plan and corporate finance vehicle that allows retiring business owners to sell their business to employees. Employees do not pay for their shares—employee ownership is instead an incremental benefit on top of wages and benefits. ESOPs have been demonstrated to create over 2.5 times more retirement wealth for workers—in addition to superior pay and benefits—compared to traditional companies.²³ Employee-owned businesses have also been shown to innovate more frequently and exhibit greater resilience during an economic downturn.²⁴

As baby boomers prepare to retire and sell their businesses, ESOPs can play an important role in maintaining domestic ownership and productive capacity across manufacturing and other strategic sectors—a win-win for U.S. economic security and for American workers across the country.
